

Dear Livestock and Seed Programs:

Please do NOT permit irradiated food to be served in the National School Lunch Program. Irradiated food has not been proven safe to eat. It degrades the nutritional content of food, and research has revealed a wide range of health problems in laboratory animals that ate irradiated food. In addition, it merely masks faulty and inhumane meat inspection. Consumers deserve the right-to-know what their children are eating, but irradiated food sold to school children is not required to be labeled. I strongly urge you to keep irradiated food out of school lunches.

*Irradiated food is not healthy. Please don't serve it.*

Sincerely,
